Liberon Wood Floor Dye is ideal for colouring bare wooden floors before varnishing and is suitable for both soft and hardwoods. Wood Floor Dye gives a professional quality and uniform result while leaving the natural beauty of the grain visible. Being EN71 Part 3 Approved Liberon Wood Floor Dye is perfect for use in family areas.

Preparation

Ensure the surface is thoroughly sanded to remove any existing finish as this may prevent the dye from penetrating evenly.

Application

Shake well before use. If more than one tin of dye is required to complete the work, mix the tins of dye together to ensure uniform colour.

Apply the Liberon Wood Floor Dye to the bare timber reasonably quickly wand along the grain using a foam applicator or brush.

Wipe off excess with a clean dry cotton cloth before it dries to even out the colour. To avoid overlap marks, work a small section at a time, using the board edge as a guide.

A second coat may be applied after 2 hours if a stronger colour is required. More than two coats of dye may affect the final finish.

Liberon Wood Floor Dye may be added to Liberon Natural Finish Floor Varnish and Hardwearing Floor Gel to create a unique range of coloured, water based varnishes. It is also compatible for use under Liberon Floor Sealer, Floor Wax, Floor Oil and High Resistance Floor Varnish.

Important: We recommend the product is first tested on an inconspicuous area to check compatibility and end colour result. The colour bar may not be a true representation of the actual colour.

Precautions

Do not mix a water-based dye with a spirit-based dye. Different types of wood produce different results. Wear gloves to avoid skin staining. Caution must be taken when using a water based varnish over Liberon Wood Floor Dye as over brushing with the first coat may reactive and remove the dye. Do not allow to freeze.

Packaging

Wood Floor Dye is available in 250 ml containers.

Colours

Medium Oak, Dark Oak, Victorian Mahogany, Antique Pine.

Health and Safety

Keep out of reach of children. Do not empty into drains. Use only in well ventilated areas.

This product should be used in accordance with the manufacturer's instructions. Recommendations are for guidance only since conditions of use are completely beyond our control.
