USAGE

Interior

COVERAGE

1 Litre

10-12 m²

APPLICATION

Cloth, brush
or spray

DRYING TIME

Minimum
30 minutes

TOOL CLEANING

White Spirit

Product use

Liberon Black Bison Liquid Wax is ideal for nourishing and protecting all types of wood. It is particularly suitable for large surfaces such as panelling, floors, doors, staircases and other large interior woodwork.

Black Bison Liquid Wax is well known for its quality and pleasant, distinctive aroma which means it has traditionally been used on antiques. It will also enhance the natural beauty of new wood whilst protecting it against dryness.

Preparation

Remove old waxes and dirt with Liberon Wax and Polish Remover if necessary. Ensure the surface is clean, dry and free from dust.

Application

Shake well before use. Apply Black Bison Liquid Wax sparingly with a cloth, brush or spray gun. Allow to become touch dry for a minimum of 30 minutes, then buff with a clean cotton cloth, or for a faster finish with a Liberon Drill Brush. Repeat the operation on new or very dry wood as it may require two or more coats. For a better quality finish apply thin coats of wax and build-up to the desired level of sheen, buffing between coats.

Important: Always test product in a spare or inconspicuous surface to check colour, compatibility and end result.

Cleaning and maintenance

Wipe over with a cloth or duster and re-wax as required when the surface looks dull and tired. Do not wash with water.

Precautions

- Not suitable for high water areas such as kitchens and bathrooms.

Colours: Clear, Neutral, Medium Oak, Dark Oak, Georgian Mahogany, Antique Pine

Packaging

500 ml, 5 L
