

## Village Green Wood Stain

### Technical Data Sheet

Village Green Wood Stain is a premium quality, non-toxic, odour free wood stain, for interior and exterior use, that will enhance your wood with a colourful vibrance that brings it to life. Rich and deep, light and exuberant, modern or traditional; tones and shades that will suit your style and personality.

Village Green Wood Stain is formulated using high concentrations of the best quality pigments and binders available, leading to dazzling, colourful finishes that are easy to apply

**PREPARATION:** Ensure that the surface is clean, dry and free from dirt and dust and any previous finish. If sanding, the wood should be sanded with the grain, using 150 – 220 grit abrasive paper.

**APPLICATION:** SHAKE WELL BEFORE USE. Application may be by brush, roller, applicator or lint free cloth. For the best results, apply the lightest coats possible, wiping off any excess, working quickly along the wet edge. Using this method, you may require multiple coats, but you can control the colour depth to perfect your finish. Allow your wood to be dry to the touch before applying additional coats. Drying time is generally 15 mins – 1 hour. Clean up with soap and water.

**FINISH:** Allow 24-48 hours for the stain to fully dry before applying a finish. You can finish your stained wood using a wax, oil, varnish or lacquer.

**COVERAGE:** 12-15 square metres per litre on sanded wood (7-10 square metres on rough sawn timber).

Keep out of reach of children. Do not consume. Use product only for its intended purpose. In case of eye contact, rinse well with water and seek medical attention if necessary

EU limit for this product (CatA/d) 130g/l VOC. This product contains a maximum of 0.2g/l VOC
